

Providing Flexible Industrial Solutions to Power & Lift Your World.

Type

1

Air

- High Pressure
- Shop Airline
- Breathing Air
- Jack Hammer
- DOT Air • Sand Blast

2

Water /Steam

- Suction & Discharge
- Water Blast
- Pressure Washer
- Irrigation • Steam

3

Fuel, A/C, Transportation

- Tank Truck
- Dispensing
- Aviation • Fuel Drop
- Vapor Recovery
- Automotive

Type

4

Material Handling

- Vactor Truck
- Mining Hose
- Fish • Cement
- Bark & Leaf

5

Chemical

- Petrochemical
- Corrosives
- Solvents
- Liquid Fertilizers

6

Food Grade

- FDA 3A & NSF rated
- Potable water, beer, wine, juice, milk, flour
- Hot cooking oil
- Stainless Sanitary Fittings

Connectors

End Connections

We stock a wide variety of end connections; NPT, NST (fire), NPSH, Camlok (cam & groove), flange (150# & TTMA), Victaulic and weld stub ends. Carbon steel, stainless, brass, aluminum and composite materials available.

ARG supplies assemblies that fit and meet many industrial specification requirements: USCG, API 1529, MSHA, NSF61, FDA and Arctic Grade.

Attachments

Full line of assorted attachable end connections to complement your particular needs.

Capabilities

Crimping

The most secure method of attaching end connections to a hose is by using a crimp collar or sleeve. At ARG we have developed crimping procedures to make sure every style of hose has its own specifications to insure the highest fitting retention. Other options available are bands, clamps and push-on depending on the hose that best suits your needs.

RFID Tagging

ARG has the ability to install a RFID chip on every hose assembly we supply. This will allow you to access the asset information to see exactly when the hose was made, how long it has been in service and the last time it was tested. Tested assemblies can be fitted with RFID chips for field identification and cert tracking.

Testing

NAHAD suggest that each new assembly gets pressure tested to one and half times the maximum working pressure before they are put into use. ARG can test and certify assemblies up to 30,000 psi.

Industrial Hose

ARG has been supplying custom made industrial hose assemblies since 1969. You can either call in to our expert staff and have the product picked up at our will call counter. Or, bring in your bad hose and wait while we make a new one for you. We excel in making hoses for every type of application you have. From tool airlines, fuel dispensing, chemical transfer to 8" material handling.

We are the secret to your success!
