# Industrial Hose

## Air

- High Pressure
- Shop Airline
- Breathing Air
- Jack Hammer
- Sand Blast

## Material Handling

- Vactor Truck
- Mining Hose
- Fish
- Cement
- Bark & Leaf

## Water/Steam

- Suction & Discharge
- Water Blast
- Pressure Washer
- Irrigation
- Steam

## Chemical

- Petrochemical
- Corrosives
- Solvents
- Liquid Fertilizers

## Fuel

- Tank Truck
- Dispensing
- Aviation
- Fuel Drop
- Vapor Recovery
- Automotive

## Food Grade

- FDA 3A & NSF rated
- Potable Water, Beer, Wine, Juice, Milk, Flour
- Hot Cooking Oil
- Stainless Sanitary Fittings

ARG supplies assemblies that fit and meet many industrial specification requirements: USCG, API 1529, MSHA, NSF61, FDA and Arctic Grade.

# Connectors

## End Connections

We stock a wide variety of end connections; pipe thread, NST (fire), Camlok (cam & groove), flange (150# & TTMA), Victaulic and weld stub ends. Carbon steel, stainless, brass, aluminum and plastic materials available.

## Attachments

Full line of assorted attachable end connections to compliment your particular needs.

# Capabilities

## Crimping

The most secure method of attaching end connections to a hose is by using a crimp collar or sleeve. At ARG we have developed crimping procedures to make sure every style of hose has its own specifications to insure the highest fitting retention. Other options available are bands, clamps and push-on depending on the hose that best suits your needs.

## Testing

NAHAD suggest that each new assembly gets pressure tested to one and half times the maximum working pressure before they are put into use. ARG can test and certify assemblies up to 30,000 psi.

## RFID Tagging

ARG has the ability to install a RFID chip on every hose assembly we supply. This will allow you to access our web page to see exactly when the hose was made, how long it has been in service and the last time it was tested.

All tested assemblies are fitted with RFID chips for field identification and cert tracking.

# Industrial Hose

ARG has been supplying custom made industrial hose assemblies since 1969. We build custom assemblies to your specifications. Call in your order for pickup, delivery, shipment, or just stop by one of our showrooms and have an assembly built while you wait. We excel in making hoses for every type of application you have. From tool air lines, fuel dispensing, chemical transfer to 8" material handling.
